OTHER DETAILS

Objective

To obtain a dynamic role in a leading organization, leveraging my technical expertise, problem-solving abilities, and passion for innovation to deliver impactful solutions and drive organizational success.

Certifications & Achievements

Hackathon Project : Doctor Recommendation Platform   **Duration :** 1 Day

Developed a dynamic website named during a university hackathon to assist patients in finding top-rated doctors in their city based on specific Disease. **Contributed to front-end development**, Led efforts in designing an intuitive user interface and integrated a robust search and filtering system powered by HTML CSS, React, NodeJs & MongoDB. The project emphasized enhancing healthcare accessibility through technology. And we were awarded participation certificates by the university's director for our contribution and teamwork.

Work Experience

Position : Web Developer

Onlive Technologies [20-Nov-2023 To 01-Dec-2024]

- Gained 1 year of hands-on experience in web development, specializing in PHP and Core PHP.
- Designed, developed, and maintained dynamic websites and applications, ensuring functionality, responsiveness, and user experience.
- Developed and implemented full-stack web applications using ASP.NET and C#, focusing on building efficient CRUD (Create, Read, Update, Delete) operations for seamless data management.

Internship / Projects

Personal Portfolio Website   **Duration :** 4 Days

Developed a personal portfolio website using HTML, CSS, JavaScript, and Bootstrap framework to showcase projects, skills, and achievements professionally.

- Integrated contact forms and project highlights to enhance visibility and engagement.
- Optimized website performance for fast loading speed and seamless navigation.
- Showcases projects, technical skills, and achievements in a professional and interactive manner.
- Integrated a PHP Mailer-powered contact form to enable seamless client interactions and inquiries through the portfolio website.
